

# PREVENTATIVE ORAL HYGIENE SCHOOL PROGRAM

*A healthy smile will keep you ready to learn!*

The Middlesex District Attorney's Office is committed to creating safe and healthy spaces where children can learn and grow. We are pleased to partner with Middlesex Community College, Regis College, Lowell Community Health Center and Medford Public Schools to provide students in Grades 2-5 with Preventative Oral Hygiene Care.

Studies have shown that students' physical and emotional well-being directly impacts their performance in school. Enrollment in this program will help children to learn lasting oral hygiene habits, receive preventative care and reduce absence from school.

- All students in grades 2 and 5 will learn how to brush, floss, and eat healthy.
- Families can sign their students up to have free preventative dental work (such as oral screenings, dental sealants, fluoride treatments) done at their school or local dental clinic.
- Forms will be sent home soon for families to sign-up.

Creating safe, healthy and happy spaces for children to grow and learn with collaborative approaches to interventions and preventions
