Narrative begins on the following page.

On February 12th 2022 at approximately 1600 Hours, Trooper Murgo and I conducted an interview of Arnav Mukherjee (███/72) and his Daughter ███████ at their residence, ████████ in Lexington. This was done in furtherance of the investigation into the fatal shooting of Brendan Reilly.

Arnav informed me that he had the windows open in his home since it was such a nice day out. Arnav stated that he could hear Police sirens and shortly after he could hear what sounded like loud shouting. His daughter reported hearing the same thing and she subsequently pulled out her phone and started recording the noises that she heard. The only thing that they could definitively say they heard for statements was someone yelling "Drop it" a lot. Both Arnav and ██ reported hearing numerous muffled pops prior to hearing 4 considerably louder, rapid bangs which they believed to be gunshots.

██ provided me with the video she took capturing the gunshots. The video has been uploaded to the Sharefile due to ACISS limitations.
